

What to do when you are self-isolating!

What to do when you are self-isolating!

Students who are self-isolating are still expected to complete school work unless you are sick. Your learning, and the opportunities that a good education will give you, is really important.

What to do when you are self-isolating!

- When you are self-isolating, all of your teachers will be notified.
- Each day, they will send you the lesson slides and any worksheets.
- This will be done through the Google Classroom for each of your classes.
Therefore, it is really important that you join all of your classes.
- The work will be really easy to find - it will be under a Topic called '**Work for students self-isolating**'.

What to do when you are self-isolating!

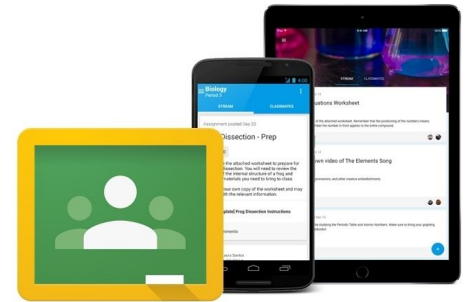

- Your teachers will make clear on the slide any tasks where you have to **SUBMIT** work, with instructions on how to submit it.
- All work, apart from these tasks, should be completed in the **Homework exercise book**.

What to do when you are self-isolating!

- The work for each day's lessons will be available by 8.40 **the following morning**. This is so your teachers can amend the slides based on the progress of the lesson and can upload any recorded episodes from the lesson which may help you.
- Therefore, you will be working a day behind on your timetable (i.e. you will complete Tuesday's lessons on Wednesday). Your teachers will make clear in the instructions the day on which the work is to be completed.
- This does mean that, on the first day of self-isolation, lessons will not be available because you will already have completed the previous day's work in school. **Therefore, on the first day of self-isolation, you should complete about one week's worth of homework.**

What to do when you are self-isolating!

- Although a computer or laptop is best, you can use a phone.
- Make sure you download the **Google Classrooms app**
- If you still cannot access the work because of IT issues, ask your parents to let us know.
